

Dear Colleagues:

**HARVARD UNIVERSITY FLOODED WITH
LETTERS IN SUPPORT OF DR. SUBRAMANIAN SWAMY**

Here is one more hard hitting letter from **Melbourne, Australia written by an eminent Indian-Australian, Pushker N. Bhat.**

In this letter to the President of Harvard University, Mr. Bhat says that the decision to drop the courses which Dr. Swamy was teaching at Harvard as "blatantly wrong", "a feather in the cap of Jihadists and Islamists"; and prompted by the "shallow understanding of the dangers of Pan-Islamic movement", on the part of Harvard.

Narain Kataria

Dr. Drew Faust, President Harvard University
Office of the President, MA Hall,
Cambridge, MA 02138 .

Dear Sir,

We are aghast at the decision of debarring Dr Subramanian Swamy from conducting his courses at the University of Harvard because, as a true patriot, he has been raising alarm over the dangers of Islamic terrorism & its consequences for India. But this action is a feather for the cap that Jihadists & Islamists wanted from a reputed world class institution. That you have obliged them so easily & conveniently indicates that the University has, pardon me to say, a shallow understanding of the dangers of Pan – Islamism. It is ironic as well, as you have now forgotten the beautiful Twin-Towers of world Trade Centre that were brought down along with the precious human resource of 3000 Americans by the kind of people who, I suspect, have influenced University to take such a blatantly wrong decision. Dr Swamy is an accomplished academician & a political activist who holds secular traditions of India & its democratic values in high regard & veneration. Dr Swamy is also a fearless crusader against corruption & other malpractices in the society & he uses judicial system & other constitutional methods to set the systems right.

Dr Swamy has been advocating case of hapless Pandits, the ab-original inhabitants of Kashmir who have been murdered in large numbers, their properties vandalised & destroyed & their women ravished & dishonoured as part of worldwide Islamic Jihad. Pandits, ran away for their lives from Kashmir two decades back & have become refugees in their own country. They were asked to accept Islam & *sharia*, or else

warned to run away from Kashmir or failing which, get killed. In 1990, mass migration of Pandits took place & for the last two decades, Pandits are living in the most inhuman tragic conditions in tents & shoddy shelters. Their temples have been desecrated, vandalised & lands encroached upon by intolerant Islamists of Kashmir. Dr Swamy being a humanist sympathises with their condition & laments that this should have happened in a secular & democratic country that India is. He discusses their miserable plight, the curse of Jihad, at public platforms, in Parliament & by his writings. But mischievously, he is made to look like a communalist by these cunning and sly actors & operators. Please understand that the movement of separation from India in Kashmir is part of pan-Islamic agenda of which the epicentre in this part of the world is Pakistan. Ideology (*Wahabism*), methods of indoctrination & funds come chiefly from Saudi Arabia.

While one can understand the urgency of USA taking on Iraq for possessing (non-existent) weapons of mass destruction, why are they in Afghanistan for the last ten years? They are there for the same reason & fears that Dr Swamy is talking about & thus is worried about. He evaluates various options before India to tackle the onslaught of Jihad & cautions Indians (called Hindus) to be watchful of their sympathisers within the country. He is not suggesting using terror machines or suicide bombers to crush sympathisers of Pakistan sponsored terrorism in Kashmir or elsewhere. He has never suggested that Hindus must arm themselves like Islamic terrorists if Govt of India fails to deliver goods. Pakistan has its terror factories working round the clock as a state policy & the target is India & USA..... & then the western world at large. They protected & sheltered Osama for the last ten years telling all the while that he was perhaps somewhere in the badlands of Waziristan & that they had no firm knowledge about him. What is happening in Pakistan these days you must be fully aware of?

Pakistan has its well calibrated Islamic agenda for India, to destabilize it. They know the route is through Kashmir where they have encouraged & are clandestinely funding a separatist movement in the name of Islam. Through Kashmir, they want India to suffer eternally & they talk of "thousand cuts" to be inflicted everyday on the body of India. If Dr Swamy is talking about Hindus, he refers to the most pacifist community living in the world, who assimilated Zoroastrians after Islamists tortured them in Persia & Muslims as well who came to India during Muslim rule: they never killed them. The Hindu word does not mean Hindu Religion but represents a way of life that is peaceful, progressive, leisurely, agile intellectually & highly philosophical accommodating all shades of beliefs like, Islam, Buddhism, and Christianity to live in harmony. As Hindus, we are dualists, monoists, even agnostics but all live together without any animosity, ill-will or anger despite differentiations. If Dr Swamy has been barred, because he is talking about Hindus, that is Indians in general; please understand he is not a terrorist, a communalist, a separatist in the name of religion, a fundamentalist, a chauvinist & a hate-monger in the name of God nor a demonic preacher of hatred. He wants full integration of Kashmir with India by abolishing, such mechanisms (Article 370) that proliferate communalism, Jihad & hatred in the name of religion.....because India believes in secularism & non-discrimination in the name of religion.

We are worried, Dr Faust , that the decision of Harvard University on Dr Subramanian may have been influenced through devious methods like offer of grants to individuals & the institution and large scale funding from Saudi Arabia, or even from Pakistan. You may be aware of the American-Kashmiri gentleman, Dr Ghulam Nabi Fai who lived in your back yard, who was playing the game for Jihadists on behalf of Pakistan clandestinely for several years till he was found out. Harvard University should not get involved in subtle & mean-ish political games & controversies at the behest of those elements that gave to the USA the infamous date "9/11" & to India "26/11".

Dr Swamy's article on terrorism was published after Nov 2008 terrorist attack in Mumbai that paralyzed the financial Capital of India for almost three days besides killing a few hundred people, some of them foreigners. The terrorist attack was executed so well that it was made possible only after a meticulous planning by and coordination and help from Govt of Pakistan. The latter one was after many terrorist attacks in Mumbai and scores of acts of terrorism in India during the last two decades. It is surprising that this article was not condemned in India, but has surprisingly surfaced here at Harvard in USA.

It would appear that pro-islamist groups have infiltrated Harvard with the aim of neutralizing any one opposing their method of using Islamic terror and other violent activities to Islamize the democratic societies (concern expressed by Dr. Swamy). If Ghulam Nabi Fai who was arrested in Virginia for channelling millions of dollars from Pakistan to cultivate Congress support for separation of Kashmir from India, infiltrating Harvard is much easier to which the renowned Institution should be aware and guard against.

Indo-Austrlians are thoroughly disappointed by this illogical and irrational decision and we urge the Harvard Management to reverse it in the true spirit of American liberalism. Do not have the name of Harvard University tarnished in the eyes & minds of a billion Indians who cherish democracy as much as you do in USA.
