

Harvard Corp. should reverse the hasty decision of a Faculty group which impairs the Corp's future relations with India.

Allowing freedom of speech in the institution is a Corporate responsibility, and any decision of a Faculty group which adversely impacts this responsibility should be reversed.

Are the Corp's Chairman and Board of Directors, Dean, Humanities (Dr. Mike Smith) and President, Harvard U (Dr. Faust) listening?

13.12.11

Jawaharlal Nehru's Annual convocation speech, Aligarh University (Jan. 24, 1948)

In this speech (embedded), Nehru asked Indian Muslims to be proud of their ancestry. Dr. Swamy said the same thing in his DNA article asking Indian Muslims to remember that their ancestors were Hindus.

Why is Harvard U. bent out of shape? Harvard U. should reverse its unconstitutional and high-handed removal of summer courses offered by Dr. Swamy straight for the last 10 years.

Are Board of Directors Harvard Corporation and President, Harvard U Prof. Faust and Dean of Humanities Prof. Mike Smith listening to the voices of Hindu community in America protesting the decision of a faculty rump?

Read the Convocation speech of Nehru and learn about the role of educational institutions. What he said about Aligarh U also applies to Harvard U.

Gentlemen, kindly read the attached speech made by Nehru in 1948. He is plainly asking Muslims to be proud of their past. So, what is wrong in Swamy telling the same thing? And why Harvard should get offended?... Mohandas
